

## TX CLINICAL CRITERIA & PROCEDURE

<b>CRITERIA NAME:</b> Eteplirsen (Exondys 51®)	<b>CRITERIA ID:</b> TX.CC.PHAR.06
<b>BUSINESS UNIT:</b> Superior HealthPlan	<b>FUNCTIONAL AREA:</b> Pharmacy
<b>EFFECTIVE DATE:</b> 4/8/2019	<b>PRODUCT(S):</b> STAR, STAR Kids, STAR Health, STAR Plus, CHIP, CHIP Perinate
<b>REVIEWED/REVISED DATE:</b> 4/17/2019, 10/11/19, 1/28/20, 4/29/20, 03/30/21, 11/22/21, 8/1/22, 07/12/23, 2/27/2024	
<b>REGULATOR MOST RECENT APPROVAL DATE(S):</b> N/A	

### CRITERIA STATEMENT:

The purpose of this clinical criteria is to provide a guide to medical necessity reviews for eteplirsen (Exondys 51®).

### PURPOSE:

Consistent with the regulation at 42 CFR Section 438.210 and 42 CFR Section 457.1230(d), services covered under managed care contracts, including clinician-administered drugs, must be furnished in an amount, duration, and scope that is no less than the amount, duration, and scope for the same services specified in the state plan. While MCOs may place appropriate limits on drugs, MCOs may not use a standard for determining medical necessity that is more restrictive than what is used in the state plan, i.e., developed by the Vendor Drug Program. For example, if a member is denied a clinician administered drug in managed care because of the MCO's prior authorization criteria but would have received the drug under the criteria specified in the state plan, then the MCO's prior authorization criteria would violate the amount, duration, and scope requirements cited above. HHSC intends to amend the Managed Care Contracts at the next opportunity to include this requirement. This same standard applies to CHIP formulary and CAD coverage.

Refer to the Outpatient Drug Services Handbook of the Texas Medicaid Provider Procedure Manual for more details on the clinical criteria and prior authorization requirements.

This medication is a non-risk based (NRB) payment drug and should follow state guidance for medical necessity review for Medicaid/CHIP due to the manner in which it is reimbursed. All determinations will be performed by a Medical Director. A pharmacy clinician will review the prior authorization request and make a recommendation to the Medical Director but will not make the ultimate determination on any case.

### SCOPE:

This criteria applies to all directors, officers, and employees of Centene Corporation, its affiliates, health plans, and subsidiary companies (collectively, the "Company").

### DEFINITIONS:

NRB = non-risk based

### POLICY:

It is the policy of Superior HealthPlan (SHP) and Centene Pharmacy Services (CPS) to follow state guidance for medical necessity review of eteplirsen (Exondys 51®); procedure code: J1428.

### *Description/Mechanism of Action:*

Eteplirsen (Exondys 51®) binds to exon 51 of dystrophin pre-messenger RNA (mRNA), resulting in exclusion of this exon during mRNA processing. Exon skipping allows for production of an internally truncated dystrophin protein.

### *FDA Approved Indications:*

Eteplirsen (Exondys 51®) is approved for the treatment of Duchenne muscular dystrophy (DMD) in patients who have a confirmed mutation of the DMD gene that is amenable to exon 51 skipping.

### *Formulations:*

Eteplirsen (Exondys 51®) injection is supplied in single-dose vials.

- Single-dose vials containing 100 mg/2 mL (50 mg/mL)
- Single-dose vials containing 500 mg/10 mL (50 mg/mL)

**PROCEDURE:**

Provider must submit documentation (which may include office chart notes and lab results) supporting that member has met all approval criteria.

**I. Initial Approval Criteria:**

**A. Duchenne Muscular Dystrophy (DMD)**

1. A Medical Director is required to review and approve or deny all requests. A pharmacy clinician will make a recommendation on the prior authorization, but ultimate determination will be made by the Medical Director only.
2. Documentation of genetic testing that confirms the client’s DMD gene is amenable to exon 51 skipping.
3. Documentation of client’s current weight, including the date the weight was obtained; the weight must be dated no more than 30 days before the request date.
4. Documentation of client’s baseline physical function. Testing tools used to measure the physical function must be age appropriate. Testing tools used can include, but is not limited to: the Brooke Upper Extremity Scale, Baseline 6-minute walk test (6MWT), or the Pediatric Evaluation of Disability Inventory.
5. Prescriber attestation that Exondys 51 will not be used concomitantly with other exon skipping therapies for DMD.
6. Documentation of the client’s dosage, administration schedule, number of injections to be administered during the prior authorization period, requested units per injection, and the dosage calculation must be submitted.

**Approval duration:** 6 months

**II. Continued Therapy**

**A. Duchenne Muscular Dystrophy (DMD)**

1. A Medical Director is required to review and approve or deny all requests. A pharmacy clinician will make a recommendation on the prior authorization, but ultimate determination will be made by the Medical Director only.
2. Currently receiving medication via the company benefit or member has previously met initial approval criteria or had received the drug from a previous Medicaid MCO (continuity of coverage).
3. Request for continuation must be received no earlier than 30 days before the current authorization period expires. Requests for recertification/extension of prior authorization received after the current prior authorization expires will be denied for dates of service that occurred before the date the request is received.
4. Documentation of client’s current weight, including the date the weight was obtained; the weight must be dated no more than 30 days before the request date.
5. The Medical Director will check for improvement in or maintenance of baseline physical function. Providers must use the same testing instrument as used in the initial evaluation. If re-use of the initial testing instrument is not appropriate, for example, due to change in client status or restricted age range of the testing tool, the provider must explain the reason for the change. Exondys 51 should not be continued on clients who experience decreasing physical function while on the medication.
6. Prescriber attestation that client has been compliant with the treatment.
7. Prescriber attestation that Exondys 51 will not be used concomitantly with other exon skipping therapies for DMD.
8. Documentation of the client’s dosage, administration schedule, number of injections to be administered during the prior authorization period, requested units per injection, and the dosage calculation must be submitted.

**Approval duration:** 6 months

**REVISION LOG**

REVISION TYPE	REVISION SUMMARY	DATE APPROVED & PUBLISHED
---------------	------------------	---------------------------

Ad Hoc Review	Added information and criteria step regarding Centene's Precision Drug Action Committee (PDAC)	10/1/2019
Ad Hoc Review	Removed incorrect maximum dosing request from initial criteria. Removed pulmonary status criteria from continuation criteria.	10/11/2019
Ad Hoc Review	Age expansion from 0-19 to 0-21 per VDP guidance	1/28/2020
Ad Hoc Review	Removed age restriction per VDP guidance	04/29/2020
Annual Review	Removed "for the child who is tested" from step 6.  Added 7 – Initial Therapy. Exondys 51 will not be used concomitantly with other exon skipping therapies for DMD, per VDP criteria.  Added 9 – Continuing Therapy: Exondys 51 will not be used concomitantly with other exon skipping therapies for DMD, per VDP criteria.  Added OUTPATIENT DRUG SERVICES HANDBOOK MARCH 2021to references	03/30/2021
Ad Hoc Review	Remove PDAC designation effective 12/1/21 Reworded criteria #2 under Continued Therapy section to match TMPPM Manual Moved notes about dosage & administration schedule to a criteria point under the Initial and Continued Therapy sections Updated references Added maximum dosage Added DMD definition to abbreviations section	11/22/2021
Ad Hoc Review	Removed specialist requirement  Changed to new P&P template  Removed step that states Medical Director may approve up to 6 months. Duplication of information since approval duration is only 6 months	08/01/2022
Annual Review	Minor formatting changes	07/12/2023
Ad Hoc Review	Updated to TX.CC.PHAR format template Added Centene copyright statement Removed of criteria step from initial and continuation: The requested dosage is for no more than 30mg/kg once weekly as dose check is not listed in TMHP CAD Manual	02/27/2024
