

# Understanding the healthcare updates.

Every health insurance plan now provides:

## Coverage for those with pre-existing conditions.

If you have a pre-existing condition (ex: diabetes, pregnancy, heart problems), you will be able to get coverage.

## No lifetime limits.

Your healthcare company will keep paying for your healthcare needs. Your coverage won't run out.

## Fair coverage at a fair cost.

Insurance companies can only look at your age, where you live and whether or not you smoke to figure out how much your health plan will cost.

## Covered preventive care for women.

Women can receive complete coverage for well-woman visits, breast-feeding support and supplies, FDA-approved birth control methods and more.

## Increased preventive care.

More preventive care services are covered. These include yearly checkups, blood pressure tests, shots and some cancer screenings.

## Increased coverage for children.

Kids can stay on a parent's healthcare plan until they are 26 years old.

## Easier ways to get coverage.

The Health Insurance Marketplace is an online shopping site where you can explore your health insurance options.

## More opportunities for subsidies.

You can get help paying for your premium with a subsidy. A subsidy is money that the government gives to your insurer to help pay for your plan.

Ambetter is a Health Insurance Marketplace plan that offers these benefits and more. **Call for details.**
